<h2>About Me</h2>
```

```
<p>
```

```
    I'm currently studying Software Engineering at the University of Sri  
Jayawardenepura (USJ).
```

```
    Although I'm still in the early stages of my  
    academic journey and haven't done many major projects yet, I'm  
    really excited to keep learning and improving. I've always been  
    interested in programming and technology, and I enjoy exploring new  
    things and solving problems. I'm working on building up my skills  
    through coursework, personal projects, and any hands on experience  
    I can get. I'm especially looking forward to discovering which areas of  
    software engineering I enjoy the most and using what I learn to build  
    real, useful things.
```

```
</p>

About Me

I'm currently studying Software Engineering at the University of Sri Jayewardenepura (USJ). Although I'm still in the early stages of my academic journey and haven't done many major projects yet, I'm really excited to keep learning and improving. I've always been interested in programming and technology, and I enjoy exploring new things and solving problems. I'm working on building up my skills through coursework, personal projects, and any hands on experience I can get. I'm especially looking forward to discovering which areas of software engineering I enjoy the most and using what I learn to build real, useful things.

Skills

Education

Activities

Achievements

Bachelor of Computing Honours in Software Engineering

University of Sri Jayewardenepura
(2024-2028)

Advanced Level (Mathematics)

D.S. Senanayake College Colombo 07
(2020-2023)

Ordinary Level

Piliyandala Central College
(2013-2019)

My Projects

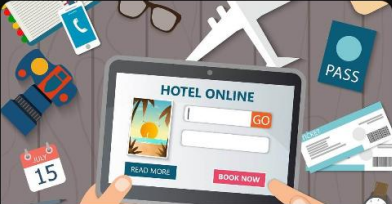

Online Pet Care Service

A web-based platform that allows pet parents to browse and purchase pet care products, earn reward points, and access exclusive discount coupons. Designed to offer a convenient and joyful shopping experience for pet lovers.

Department Events Calendar

A web-based system designed to manage and display upcoming events, meetings, and important dates related to a specific department. It allows staff, faculty, and students to stay informed and organized by viewing, adding, and tracking departmental events in a centralized calendar interface.

Online Hotel Room Booking System

An online platform that allows users to search, view, and book hotel rooms based on availability, location, and preferences. The system provides real-time room availability, booking confirmation, customer registration, and payment integration. It aims to simplify the hotel reservation process for both customers and hotel administrators.
